

The perfect central management system for ATM and Video Surveillance

Operation and Management

- Multi Language and simple graphic user interface
- A system that oversees multiple DVRs, supports LAN/WAN network connection and management.
- Real-time event notification such as video loss, DVR disconnect, high temperature, fan RPM rate and recording days
- Keyword search by ATM ID and location for live view or video playback.
- Client software are available for multiple users
- Multiple user level and authority management
- Password change reminder for security purpose

Real-time Live View and Video Search

- Integrated with ATM electric journal, overlays transaction data, camera name, time and date on the video.
- AVI Export Schedule. Schedule multiple transaction videos at one time and system will auto export.

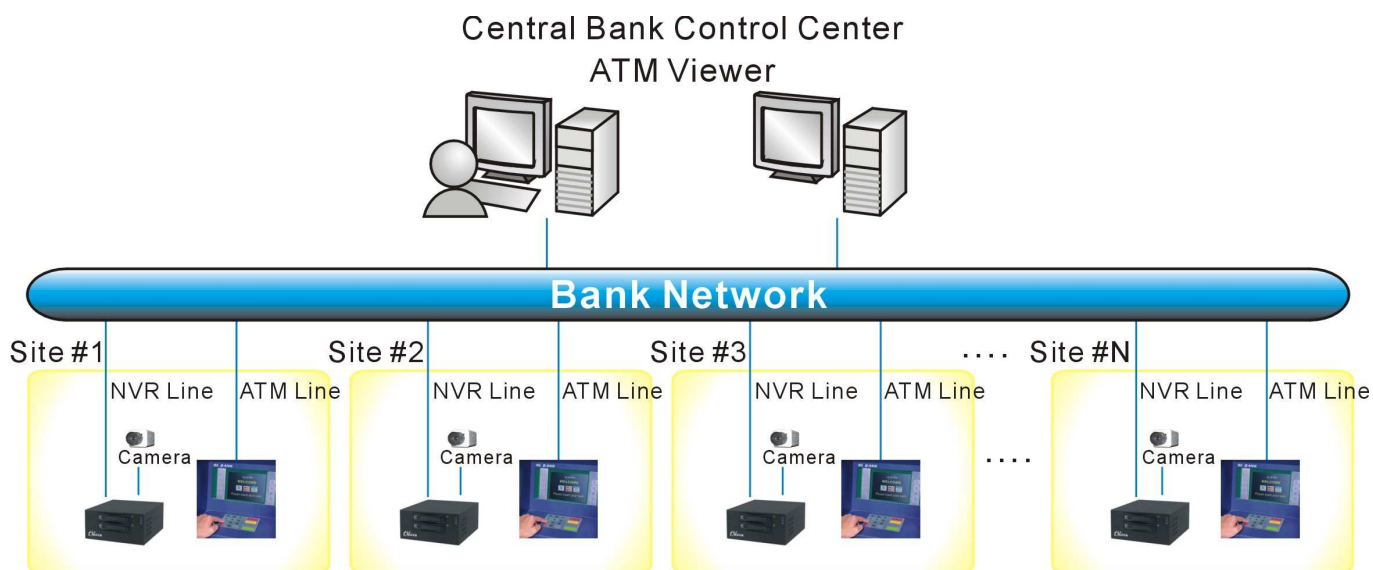

Quick Card Number Search

- Integrated with ATM systems and transactions for quick ATM ID and transaction search, and export for video evidence.

Optimized Video Compression and Transmission Technology

- Capable of compressing video to the perfect size to optimize center's viewing speed and data exporting.
