How to setup E-mail notification in CMS software?

The E-mail notification is to help you to setup the mail address which will receive the alarm notification by E-mail with the alarm type and the screen-shot of the alarm-raising camera.

1. Please click the Setup icon  on the main menu bar of the CMS, it will switch into the Setup Mode. Then click on the E-mail button on the left menu, the screen will change to E-mail setting page.

The screenshot displays the 'E-Mail' configuration page in the TXPER CMS software. On the left, a vertical menu lists various system settings, with 'E-Mail' selected. The main window is divided into two sections: 'Sender Email Account Info' and 'Example'. Each section contains input fields for 'Name', 'From', 'SMTP Server', 'Login', and 'Password'. Below these fields are buttons for 'Import From Outlook Express', 'Import From Microsoft Office Outlook', and 'Send a Test Mail'. A checkbox labeled 'Send mail if alarm occurred' is checked. There is also a field for 'Attach Alarm Image' and a 'Subject' field containing the text 'Test'. At the bottom, a large empty box is designated for 'Recipient Address'.

2. There is an example already listed on the upper-right of the screen.

Example:

Name:	Central Management Server
From Address:	CMS-Sample@CMSSample.com
SMTP Server:	CMSSample.com
Login:	CMSSample
Password:	*****

3. Input user (sender) name, sender's email address, sender's SMTP server and sender's email account's user name and password.
If you have Outlook/Outlook Express installed on CMS already, click **Import** for email account information.
4. **Send Mail if Alarm Occurred:** Check this box to enable email notification when an alarm is triggered.
5. **Attach Image:** Check this box to attach alarm image to the email notification.
6. Enter a subject for your email in the **Subject** field.
7. Click **Add Mail Address** to insert and add recipient email address.
8. Select existing email address and click **Remove Mail Address** to remove.
9. Click  to send a test message.
